Taking a comprehensive, people-centered approach to development

**Myanmar Institute for Integrated Development (MIID)**, was founded in Yangon in 2013, as a Myanmar based research-for-development institute. Our objective is to support the country's democratic transition and subsequent economic and social changes. MIID promotes the inclusion of disadvantaged upland regions and rural areas with a high proportion of ethnic minorities and a history of armed conflict.

The Institute builds on in-country experience over more than two decades; it retains a core of experienced national and international development practitioners and academics for research, implementation and project evaluation. Our approach is people-centered and supports sustainable economic development by recognizing the interconnected nature of natural resources management, environmental conservation, good governance and social protection.

## 1 Natural Resource Management

- ◆ Environmental conservation
- ◆ Climate change adaptation
- ◆ Rivers & lakes
- ◆ Rural livelihoods
- ◆ Agricultural value chains

## 2 Heritage Conservation

- ◆ Natural & cultural heritage conservation
- ◆ Eco-tourism planning
- ◆ Community involvement in tourism

## 3 Governance and Social Development

- ◆ Participatory development planning
- ◆ Civil society strengthening
- ◆ Social protection & social inclusion
- ◆ Local governance
